**Why is my google account associated with a region?**

Your account is associated with a region for the following reasons:

- To determine the Google affiliate that provides the services, processes your information, and is responsible for complying with applicable privacy laws.
- To determine the version of the terms that govern your relationship, which can vary depending on local laws.
- To apply region-specific requirements for Google services where you live.

**Does google send my search requests to websites?**

When you click on a search result in Google Search, your web browser sends certain information to the destination webpage. Your search terms may appear in the Internet address, or URL, of the search results page, but Google Search is intended to prevent browsers from sending that URL to the destination page as the Referrer URL.
